

## Pulse Magnetic field Tester

### Model

KCS-601AH

### Function

- Used for measuring pulsed magnetic field peak value.

### Peculiarity

- ◆ Adopt the most advanced high-speed integration circuit. The peak value of the pulsed waveform can be accurately captured and then converted into magnetic field (Tesla value).
- ◆ Polarity switchable .
- ◆ Manual zeroing.
- ◆ Can be set the high and low limit to tell if the result is qualified.
- ◆ Digital hold function.

### Technical parameter

Model	KCS-601A	Resolution	0.01T
Power	AC.220V 50Hz	Operating temperature	-5°C~40°C
Warm-up time	2min	Relative humidity	0% ~ 70% (indoors)
Displays the valid range	0.01 T~19.99 T	Dimensions	W D H 250x235x110
Error	1%~2%	Weight	About 3 KG

充磁、退磁、测量磁
