

Pulse Magnetic field Tester

Model

KCS-601A

Function

- Used for measuring pulsed magnetic field peak value.

Peculiarity

- ◆ Adopt the most advanced high-speed integration circuit. The peak value of the pulsed waveform can be accurately captured and then converted into magnetic field (Tesla value).
- ◆ Polarity switchable .
- ◆ Manual Zero Press and hold to maintain the zero state.
- ◆ Manual Zero Press and hold to maintain the zero state.

Technical parameter

Model	KCS-601A	Resolution	0.01T
Power	AC.220V 50Hz	Operating temperature	-5°C~40°C
Warm-up time	2min	Relative humidity	0% ~ 70% (indoors)
Displays the valid range	0.01 T~19.99 T	Dimensions	W D H 260x260x70
Error	1%~2%	Weight	About 3 KG

充磁、退磁、测量磁
