

脉冲电流测试仪/Pulsed Current Tester

KCS-601CH

特点:

- 专门用于测试充磁头内瞬间电流峰值
- 采用目前最先进的高速积分电路，能精确地捕捉到脉冲波形的峰值，然后转化为磁场电流。
- 可以设定上下线，判断测试结果是否合格。

Feature:

- Used for measuring pulsed current peak value.
- Adopt the most advanced high-speed integration circuit. The peak value of the pulsed waveform can be accurately captured and then converted into current value.
- Can be set the high and low limit to tell if the result is qualified.

技术参数 / Technical parameters:

量程范围 / Range:	0.1KA ~ 999.9KA
最大分辨率 / Max resolution:	0.1KA
允许误差 / Error:	1% ~ 2%
供电电源 / Power supply:	220VAC,50Hz
显示方式 / Display mode:	3 位半 LED 显示 3 and half LED display
仪器尺寸 / Dimension:	300mm×190mm×65mm
预热时间 / Warm-up time:	2 min
