

Pulse Current Tester

Model

KCS-601CH

Function

- Used for measuring pulsed current peak value.

Peculiarity

- ◆ Adopt the most advanced high-speed integration circuit. The peak value of the pulsed waveform can be accurately captured and then converted into current value.
- ◆ The direction of the current can be switched.
- ◆ Manual zeroing.
- ◆ Can be set the high and low limit to tell if the result is qualified.
- ◆ Digital hold function.

Technical parameter

Model	KCS-601CH	Resolution	0.1KA
Power	AC.220V 50Hz	Operating temperature	-5°C~40°C
Warm-up time	2min	Relative humidity	0%~70% (indoors)
Displays the valid range	0.1 KA~999.9 KA	Dimensions	W D H 250x235x110
Error	1%~2%	Weight	About 3 KG

充磁、退磁、测量磁
